We are looking for our location in Weikersheim in 2015 for

**IT specialist – application development (m/f)**

TecAlliance is the europaweit führende Informations-, Service- und Kommunikationsplattform für alle Teilnehmer im freien Kfz-Ersatzteil- und Reparaturmarkt. Als starke Allianz im Verbund der drei Geschäftsbereiche TecDoc, TecCom und TecRMI sorgt TecAlliance für mehr Wettbewerbsfähigkeit im Automotive Aftermarket.

Integrierte Lösungen helfen unseren Kunden (Kfz-Teileherstellern, Ersatzteilhändlern und freien Kfz-Werkstätten) Absatz und Umsatz zu steigern sowie Prozesse zu optimieren:

- **TecCom** – lieferantenübergreifende, standardisierte Abwicklung elektro- nischer Bestell- und Lieferprozesse
- **TecDoc** – herstellerübergreifende, standardisierte Produkt- und Fahrzeugdaten
- **TecRMI** – herstellerübergreifende, standardisierte Reparatur- und Wartungsinformationen rund um die Uhr

Werden Sie Teil eines der innovativsten, dynamischsten und mitarbeiterfreundlichsten Unternehmen Deutschlands. Wir freuen uns auf Sie!

The Training …

Learning programming languages, developing program code and software, getting to know tools and systems, creating apps and thrilling people with your internet pages and applications: If you enjoy working a lot with computers, that’s probably music to your ears.

IT specialists for application development are interpreters. They translate ideas and concepts into a clean, functioning code and thus make our lives a little bit easier. In the course of your training, you will get to know all aspects of individual software development and will have everything you need at your fingertips to turn your hobby into a career. You will work with state-of-the-art programming languages and frameworks, will learn to master the fine art of software testing, and will integrate yourself into development teams. The basics of conceptual design, interface design and usability will also be contained in your toolbox after you have finished your training.

During your training will expect you:

- rotation to our sites Ismaning near Munich, Cologne and Kassel
- use programming languages
- develop and adapt information and communications systems and user interfaces
- create and maintain databases
- create test plans and evaluate results
- rectify system errors with the help of expert and diagnostic tools
- train and advise users

Duration of training:

3 years

“As a user you can only use the programs and have to rely on how others define user-friendliness. When I program myself, it’s up to me what the program looks like and how the user ultimately employs it. Who hasn’t ever asked themselves what the programmer was actually thinking when they wrote the program and whether they thought about the users at all? I can combine creativity with technology and logic, and the result is something which makes other peoples’ lives easier. I’m sure not everybody can claim that of their profession,” said Jonny Liebsch, a trainee in his third year of the course for IT specialists with a focus on application development.

Interested?

If you can contribute things like…

- a good completed secondary school leaving or a vocational diploma/A-Levels
- interests in mathematics, computer science and technical interrelationships
- good knowledge in English
- a good imagination as well as logical understanding and the ability to solve complex problems systematically
- willingness to learn
- willingness to travel

... then we look forward to receiving your interesting application! Please send us your CV, your motivation letter and references to recruitment@tecalliance.net.

If you have any questions, please contact Mrs Michaela Keidel, phone number +49 (0)7934 99299-511.

Our offer:

We offer you the opportunity to gain an insight into our different areas and processes across our locations. Last but not least we offer to start at TecAlliance at a very exciting time at an established employer as a service provider with a special international USP within the Independent Automotive Aftermarket.
